### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Julie Richardson on January 31, 2005.

The application has been amended as follows:

Cancel Claims 46, 50-54, 56 and 57.

2. The following is an examiner's statement of reasons for allowance: After reviewing the amendment and remarks filed on November 23, 2004, the claims were found to be allowable since no prior art could be found teaching or suggesting a method for performing a hearing test over a computer network, comprising: controlling the output of the hearing assessment signals during the administering step such that the clinician at the test administration site determines which hearing assessment signals of the generating step are relayed locally to the patient, as claimed in Claim 1; the interactively relaying step is carried out to allow the clinician to selectively initiate a second test stimuli after receiving a patient's response to a first test stimuli during the administering step, as claimed in Claim 2; adjusting the output of the hearing assessment signal during the administering step based on the response of the patient

and a command sent from the remote site, as claimed in Claim 3; transmitting a command from the test administering site to increase the sound intensity level of at least one of the plurality of hearing assessment signals relayed to the patient at the local site, and transmitting a command from the test administration site to decrease the sound intensity levels of at least one of the plurality of hearing assessment signals during the administering step, as claimed in Claim 6; controlling the sound intensity of the hearing assessment signals delivered to the patient from the test administration site, and wherein the clinician adjusts the sound intensity of a selected frequency of the hearing assessment signals which are delivered to the patient responsive to the patient's response to a particular hearing assessment signal frequency transmitted thereto, as claimed in Claim 10; receiving requests from the web client which provide parameters for performing the diagnostic hearing test during the diagnostic hearing test, and controlling operation of the diagnostic test device based on the parameters of the received request from the web client so as to provide control of the diagnostic hearing test, as claimed in Claim 38; wherein the hearing evaluation device is configured to receive commands from a remote site through the processor over the computer network during the hearing evaluation to allow the remote site to select and/or adjust the tones generated by the tone generator, as claimed in Claim 47; transmitting commands from a remote test administration site to a local patient testing site during at least a portion of the measurement obtaining step, as claimed in Claim 55; and a local audiometer in communication with the controller and configured to selectively output a plurality of hearing assessment signals controlled by the remote test site via the web server during

the hearing test and receive patient responses thereto, as claimed in Claim 60. Claim 31 remains allowable per the reasons set forth in the Office Action mailed on October 4, 2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Szmaj who's telephone number is (571) 272-4733. The examiner can normally be reached on Monday-Friday, with second Fridays off.
